

VERSATILE APPLICATION

ALL-NATURAL SCIENCE

DEPLOYABLE SERVICE

## DISINFECTION FOR EVERY STAGE OF PRODUCTION

While the growing population continues to depend on high-quality food, **SteraMist disinfection is dedicated to providing exceptional results.** With a trusted multi-industry history, SteraMist cold plasma technology protects food facilities and equipment from the growing threat of highly-resistant microbial organism contaminants with trusted efficacy and a wide range of benefits.

EASILY MAINTAINED UPKEEP  
WITH REDUCED LABOR COST

Significantly reduce labor costs with no mixing or wiping required, as well as no lengthy dwell time and faster turnover.

REDUCED CONTAMINANTS  
WITH SIMPLIFIED PROTOCOLS

Dramatically reduce fungal growth, mold spores, and yield loss with 360° application and powerful submicron-sized particles.

MINIMIZED OVERHEAD &  
IMPROVED POTENTIAL PROFIT

Unlike other disinfectants, SteraMist prevents facility, product, and equipment corrosion to reduce long-term costs.

As global tracing protocols are tightened to encourage responsible sourcing, SteraMist offers a powerful, extensively validated EPA-Registered solution to easily prevent product contamination, yield loss, and facility shutdowns. Ensure unmatched product quality and peace-of-mind with SteraMist products and service.

## SURFACE **DISINFECTION**

*Fast 5-Second Application*

### SURFACE UNIT®

*Precision Control*

The Surface Unit brings you handheld control with mobility around treated areas, accessory storage, and direct power functionality.

### STERAPAK®

*Cordless Portability*

Place the power of SteraMist on your back and deliver innovative disinfection using a rechargeable battery, cordless operation, and a compact BIT Solution bottle.

## FULL-ROOM & **ENCLOSURE**

*Intelligent Decontamination Solutions*

### ENVIRONMENT SYSTEM®

*Whole Room Treatment*

The Environment System delivers full-room decontamination with unparalleled scalability with data exporting, multi-app use, and remote modes.

### SELECT SURFACE UNIT®

*Fully-Controlled Injection*

For the ultimate controlled small enclosure decontamination experience, the Select Surface Unit features a programmable airflow, potentiometer, timer, remote functionality, and digital cycle data exporting.

## **CUSTOM** IMPLEMENTATION

### CUSTOM ENGINEERED **SYSTEM**

*A Premium, Tailored Experience*

If your needs reach beyond a single SteraMist product, build us into your facility! Custom Engineered Systems (CES) are designed around specific customer needs to achieve strict compliance with optimal results, available in permanent, semi-permanent, & portable solutions.

LET US HELP YOU FIND **YOUR** SOLUTION!
